People Data

Messaging Platform · https://www.skycore.com/help/people/

The People page is a page where you can view your audience members’ personal data.

Along with the subscriber’s phone number, the front page displays the name and email if available. All personal data of a particular subscriber can be viewed by pressing the “View” link for that subscriber.

To store and collect personal data from your audience members, create your personal tags to store the personal data.
